NAVSAD ALAM

Senior Unreal Engine Artist | VR Developer | Interactive Visualizations

Delhi, India | +91 9643736167 | naushad2103@gmail.com | linkedin.com/in/nnaushart

PROFESSIONAL SUMMARY

Interactive Visualization and Unreal Engine Artist with over 8 years of professional experience at Opus Visual, New Delhi. Expert in building real-time architectural visualizations, interactive VR/AR applications, multiplayer systems, and custom editor tooling. Experienced in owning the pipeline from 3D assets to final deployment across PC, Oculus Quest, and web platforms (using KRPANO/3D Vista and WebGL). Specialize in writing custom editor plugins that automate repetitive workflows to accelerate production times.

TECHNICAL SKILLS

- **Game Engines & Scripting:** Unreal Engine 5, Blueprints, Level Sequences, Data Assets, Custom Editor Utility Blueprints
- **Web & Panoramic VR:** KRPANO, 3DVista, WebGL, Javascript, Html, Css, Analytics
- **3D Art & Assets:** 3ds Max, Datasmith, Adobe Photoshop, Adobe Illustrator
- **Rendering & Lighting:** Path Tracing, Ray Tracing (RTX), Lumen, HDRI Environments, lightmap baking
- **VR/AR Hardware:** Oculus Quest (1 & 2), PC-based VR headsets (HTC Vive, Oculus Rift)
- **Version Control & Databases:** Git, Firebase

WORK EXPERIENCE

Senior Unreal Engine Artist | Opus Visual, New Delhi June 2017 – Present

- **VR Medical Education App (Oculus Quest):** Built a multi-user VR training application using Blueprints. Integrated synchronized 3D organ models, interactive medical topic selection, built-in voice chat, and a tablet-controlled dashboard for instructors to manage active sessions in real-time.
- **Agricultural Educational Game (PC VR):** Developed a progressive, 3-stage gamified training simulator for agricultural students. Coded a custom scoring and assessment engine that tracks errors and evaluates performance metrics.
- **Multiplayer Architectural Walkthrough (PC & VR):** Developed a collaborative design review application with material swapping (flooring, cabinetry, finishes), a real-time mini-map/floor plan viewer, and presenter controls (group teleportation) for client presentations.
- **Automotive Bus Configurator (PC):** Created a high-fidelity real-time configurator for Karsan buses. Implemented real-time paint, trim, and material configuration using RTX ray tracing and designed a seamless transition into a driveable physics simulation.
- **High-Fidelity Rendering:** Handled scene layout, lighting setup, and material assignments from scratch using Unreal Engine 5's Path Tracer for final renders and Lumen for real-time previewing.
- **Batch-Lighting Editor Plugin:** Wrote an editor utility script that auto-populates window and ceiling light sources (Rect and Spot lights) onto selected mesh actors via right-click context menu, reducing manual placement time by ~80%.
- **Sequence Render Generator:** Developed an editor tool that automatically sets up Level Sequences and camera arrays to batch-render 360-degree panoramas and still shots with a single click.
- **Batch-Material Swap Tool:** Programmed a utility tool that cross-references a material database sheet, matches asset names in the content browser, and replaces materials across thousands of selected static meshes instantly.

- **3D Scan Tour Web App:** Engineered a web-based 3D Gaussian Splatting viewer with real-time viewport optimization for smooth navigation.
- **Interactive Site & Floor Planners:** Built AI-assisted interactive planning tools and 2D floor plan layout explorers using WebGL, JavaScript, and Firebase to synchronize data instantly.
- **Panoramic Tours:** Authored custom XML and UI interfaces for interactive 360-degree virtual walkthroughs deployed on the web.

EDUCATION

Bachelor of Science in Computer Science (B.Sc. CS) | Lucknow University, India 2009 – 2012

LANGUAGES & INTERESTS

Languages: Hindi (Native), English

Interests: Painting, movies, mountain trekking
